OUR SERVICES

By aligning with the best vendors in the world and only hiring the most skilled employees, Schad strives to perfect every project for our clients.

+ Product and Material Distribution

- Schad represents the product lines of several reputable refractory manufacturers

+ Logistics

- Utilizing our fleet of tractor trailers and stake trucks, we offer immediate response to our customers' needs. Our ability to ship materials and equipment quickly makes us a good choice for your turnkey projects.

+ Pre-construction Services

- Long-term maintenance plan development
- Value engineering
- Project team recommendation/assembly

+ Field Installations

- Schad is experienced at installing several types of materials, using numerous application methods including:

- Brick
- Monolithics
 - Vibe Cast
 - Gunitite
 - Shotcrete
 - Rammed
- Ceramic Fiber

+ Off-site Fabrication

- Steel Fabrication
- Refractory pre-cast shapes
- Turn-key projects
- "If it fits on a truck, Schad can do it"

Schad Refractory Construction was founded in 1942 to service the growing manufacturing base in Southeastern Michigan.

Since that time, Schad has grown to service a diverse customer base and an ever-expanding geographical area throughout the Midwestern United States.

We offer immediate response to your refractory requirements. Schad's 40,000 square feet of warehouse space as well as our 15,000 square feet of fabrication/pre-cast space—which includes three overhead cranes, three mobile dry-out units and one dry-out furnace—enable us to effectively respond to planned and unplanned needs as they occur.

Our reputation as well as our customers' expectations on all projects make safety, quality and service our top priorities.

Schad's vision is to be a national, full-service refractory leader, consistently recognized for industry and geographic growth. We create value for each customer through high-quality and on-time delivery of our services, and provide a safe, challenging, team-oriented work environment for employees.
